CAREER OBJECTIVE

I have professional experience in web application architecture and development as a proficient software developer. My goal is to take on a job and be a member of a fantastic development team that allows me to take responsibility for the analysis, design, implementation, testing, and documentation of the applications I work on, allowing my creative problem-solving talents to be fully utilized, as well as acquiring new skills while developing those I currently have.

SKILLS

- Strong Communication
- ReactJS and TypeScript
- Flexibility and Adaptability
- Problem-Solving
- NestJS and MongoDB
- Project Management Tools
- Agile Framework
- Analytical and Critical Thinking
- Decision Making

EXPERIENCE

April 2021 - Present

FULL STACK WEB DEVELOPER

Nawvel

- Developed a UI component library with reusable, browser-compatible, and responsive elements that reduced monthly development time by approximately 200 hours.
- Collaborated with the planning and design team to construct a client-side application for a resource management platform that allows users to create, manage, and share resources using ReactJS and Redux.
- Created a safe, scalable, and well-tested REST API using NestJS and MongoDB, which was used in the client-side application.
- Created a CI/CD pipeline that reduced the time required to build and deploy the client-side application and the REST API by more than 50%.
- Reduced the monthly deployment costs by approximately 70% by using the proper deployment procedures and processes.

EDUCATION

BACHELOR OF TECHNOLOGY

Jamia Millia Islamia University
2017 - 2021
